

MEDICAL ORGANIZATIONS /SCIENTIFIC WARNINGS

In 2008, the *National Academy of Sciences* issued a report, "Identification of Research Needs Relating to Adverse Health Effects of Wireless Communication."
nap.edu/catalog.php?record_id=12036

In 2008, *The International Commission on Electromagnetic Safety* (comprised of scientists from 16 nations) recommended limiting cell phone use by children, teenagers, pregnant women and the elderly. icems.eu/resolution.htm

In 2008, the *Russian National Committee for Non-Ionizing Radiation Protection* warned that cell phones are unsafe even for short conversations. Children under 16, pregnant women, epileptics, and people with memory loss, sleep disorders and neurological diseases should never use cell phones. radiationresearch.org/pdfs/mcnirp_children.pdf.

In 2008, the *University of Pittsburg's Cancer Institute* warned that children should never use a cell phone except in an emergency. post-gazette.com/pg/08205/898803-114.stm

In November, 2009, an international team of physicians and scientists met in Seletun, Norway and created the *Seletun Scientific Statement* to urge new, biologically-based public exposure standards to protect public health worldwide regarding electromagnetic fields and radiofrequency radiation. (Fragopoulou et al, "Scientific Panel on Electromagnetic Field Health Risks: Consensus Points, Recommendations and Rationales," *Reviews on Environmental Health*, Vol. 25, No. 4, 2010.)

In 2009, more than 50 scientists from 16 countries signed *The Porto Alegre Resolution*, an urgent call for more research based on "the body of evidence that indicates that exposure to electromagnetic fields interferes with basic human biology."

May 31, 2011 *The World Health Organization* classified radiofrequency electromagnetic fields as a possible carcinogen. Also that month, the *WHO* added multiple chemical sensitivity and electrohypersensitivity (EHS) on its International Classification of Diseases.

In January, 2012, *The American Academy of Environmental Medicine* called for an immediate moratorium on "smart" meters until "serious health issues" related to their installation are resolved. See the appendix.

The Austrian Medical Association created guidelines for the diagnosis and treatment of EMF-related health problems and illnesses in March, 2012.
aerztekammer.at/documents/10618/976981/EMF-Guideline.pdf.

In June, 2012, *Women's College Hospital* in Toronto stated that family doctors must learn to detect symptoms of exposure to radiation from wireless devices--including disrupted sleep, headaches, nausea, dizziness, heart palpitations, memory problems and rashes.
womenscolleghospital.ca/news-and-events/connect/the-effects-of-invisible-waves.

In August, 2012, *Israel's Ministry of Health* called for a ban on Wi-Fi in schools.
norad4u.blogspot.co.il/2012/08/this-is-translation-to-english-of.html.

In December, 2012, *the American Academy of Pediatrics* endorsed the Cell Phone Right to Know Act because of its "emphasis on examining the effects of radiofrequency (RF) energy on vulnerable populations, including children and pregnant women." See the appendix.

In February, 2013, *Belgium's Public Health Minister* announced that sales of mobile phones to children under seven will be prohibited, as will advertisements for mobile phones during children's TV, radio and Internet programming.
expatica.com/be/news/belgian-news/TMag-Mobile-phones-to-be-banned-for-children_259994.html.

In a February 8, 2013 letter to the Los Angeles Unified School District, *Martha Herbert, MD, PhD, a pediatric neurologist at Harvard Medical School*, wrote, "EMF/RFR from wifi and cell towers can exert a disorganizing effect on the ability to learn and remember, and can also be destabilizing to immune and metabolic function. This will make it harder for some children to learn, particularly those who are already having problems.... I urge you to step back from your intention to go with wifi in the LAUSD, and instead opt for wired technologies.... It will be easier for you to make a healthier decision now than to undo a misguided decision later."

In March, 2013, *Australia's Radiation Protection and Nuclear Safety Agency* advised parents to limit children's use of mobile and cordless phones and to keep monitors at least a meter away from babies' beds in order to minimize their exposure to EMR.
