PETITION TO THE HOUSE OF COMMONS IN PARLIAMENT ASSEMBLED Create mechanism for Canadians to report adverse effects of exposure to wireless radiation

We, the undersigned Citizens of Canada draw to the attention of the House the following:

WHEREAS, the American Academy of Environmental Medicine has estimated that 3% of the population will experience immediate adverse reactions from exposure to wireless radiation and a further 30% will have delayed reactions;

WHEREAS, the government has not yet acted on the recommendation in the 2010 report by the House of Commons Standing Committee on Health to create a way for members of the public to report adverse reactions to wireless radiation;

THEREFORE, your petitioners call upon the Government of Canada to immediately create an official mechanism whereby Canadians are able to report adverse reactions they may be experiencing from exposure to wireless radiation.
